Risk Factors

Investing in the AB BANK 1ST MUTUAL FUND (hereinafter the Fund) involves certain considerations in addition to the risks normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund may go down as well as up and there can be no assurance that on redemption, or otherwise, investors will receive the amount originally invested. Accordingly, the Fund is only suitable for investment by investors who understand the risks involved and who are willing and able to withstand the loss of their investments. In particular, prospective investors should consider the following risks:

1. **In General:** There is no assurance that the Fund will meet its investment objective; investors could lose money by investing in the Fund. As with all mutual funds, an investment in the Fund is not insured or guaranteed by the Government of Bangladesh or any other government agency.
2. **Market Price Risk:** Stock prices and Mutual Fund prices generally fluctuate because of the interplay of the various market forces that may affect a single issuer, industry or the market as a whole. The Fund may lose its value or experience a substantial loss in its investments due to such market volatility.
3. **NAV Risk:** Stock market trends show that prices of many listed securities move in unpredictable directions, which may affect the value of the Fund's portfolio of listed securities. Depending on its exposure to such securities, the net asset value of units issued under this Fund can go up or down depending on various factors and forces affecting the capital markets. Moreover, there is no guarantee that the market price of the Fund's units will fully reflect the underlying asset value of the Fund.
4. **Issuer Risk:** In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the Fund's value may be impaired.
5. **Asset Allocation Risk:** Due to a very thin secondary debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. In addition, limited availability of money market instruments in the market implies that there are only few opportunities for short term or temporary investments for the Fund.
6. **Lack of Diversification Risk:** Due to small numbers of listed securities in both the Stock Exchanges, it may be difficult to invest the Fund's assets in a widely diversified portfolio.
7. **Liquidation Risk:** Market conditions and investment allocation may impact on the ability to sell securities during periods of market volatility. The Fund may not be able to sell securities or instruments at the appropriate price and/or time.
8. **Dividend Risk:** If the companies wherein the Fund will be invested fail to pay expected dividend, it may affect the overall returns of the Fund.
9. **Investment Strategy Risk:** The Fund is subject to management strategy risk because it is an actively managed investment portfolio. The AMC will apply investment techniques and risk analyses in making investment decisions for the Fund, but there can be no guarantee that these techniques and analyses will produce the desired results.
10. **Socio-Political & Natural Disaster Risk:** Uncertainties resulting from political and social instability may affect the value of the Fund's Assets. In addition, adverse natural climatic condition may hamper the performance of the Fund.

2. BACKGROUND

2.1. FORMATION OF AB BANK 1ST MUTUAL FUND:

Over the last decade, Bangladesh equity (share) market has experienced rapid growth in size and volume” and has been identified as one of the most promising frontier markets in the globe. Yet the nature and composition of this growth has given rise to serious structural challenges, such as retail heavy investor base, speculation prone investing, and unusually high churn. Such characteristics expose the Bangladeshi share market to excessive volatility, often decoupled from fundamentals. Amongst such volatility, the small retail investor lacking unbiased research and proper risk management is often left “holding the bag” suffering large losses. However, this dynamic is not unique to Bangladesh but symptomatic of most early-stage share markets. Also, there is a proven and time-tested solution.

For over 300 years, almost as long as the history of commercial banks, Mutual Funds have been protecting the interests of small retail investors. Mutual Funds are highly regulated structures that pool investment capital from thousands of retail investors and institutions and the cumulative assets are then invested by professional fund managers, such as RACE Management. It is rare to find examples of capital markets that have evolved from “frontier” to “developed” without the growth and dominance of the mutual fund sector. First, by virtue of being managed by professionals mutual funds invest on the basis of fundamental research and protect such investments from catastrophic loss through proper risk-management. Second, as investment pools, mutual funds tend to be large in size and can act as a counterweight to manipulation in the market by informal syndicates. Third, as highly regulated, transparent entities, mutual funds are “investment institutions” in the most pure form and help institutionalize the capital market.

During the last two years, the Bangladesh mutual fund sector has been re-energized. RACE has successfully structured and launched seven mutual funds during this period, bringing in entirely new classes of sponsors, such as Banks and Insurance companies, and new group of retail investors under the umbrella of these funds. Yet, overall the mutual fund sector in Bangladesh is small and is far from attaining critical mass.

It is against this backdrop that AB Bank Ltd. has stepped into the mutual fund sector. Over the last two decades, AB Bank Ltd. has been at the forefront of financial innovation in the Bangladeshi capital markets. Through its subsidiary AB Investment Ltd., the Bank has been promoting research based portfolio management for retail investors. Now, to further enhance the efficiency and transparency of the country’s capital markets the Bank has decided to sponsor its first mutual fund, **AB BANK 1ST MUTUAL FUND**.

In this endeavor, ABBL has appointed **RACE Management PCL** to be the Fund Manager. RACE Management PCL has already developed a successful track record as a successful Fund Manager in the Bangladeshi Capital Market. The Bank has also appointed **Bangladesh General Insurance Company (BGIC)** as the Trustee and **BRAC Bank Limited** as the Custodian of the Fund.

2.2. FORMATION OF THE PROPOSED MUTUAL FUND IN THE CONTEXT OF PRESENT MARKET SCENARIO:

Since 2006, a number of factors have increased the popularity of stock market investing among Bangladeshi retail investors, including: rising income, low interest rates in traditional bank savings accounts, large stock investment gains, and increased media coverage. This exponential increase in demand is reflected in the 12x growth in average daily trading volume in the stock market during the last 3 years – from Tk. 200 crores in 2006-07 to its peak level of over Tk. 2,500 crores.

Despite this significant growth in investor participation in the Bangladeshi stock market, and the demand for professionally managed investment vehicles, the domestic mutual fund industry has not responded with adequate supply. With less than 40 individual funds to choose and over Tk. 3,500 crores in funds under management, the mutual fund industry has been slow to respond to current capital market realities and comprises only a small percentage of the total stock market investments. To meet this large unsatisfied demand for mutual fund investments in Bangladesh, AB Bank Limited is floating the **AB BANK 1ST MUTUAL FUND**.

It should also be mentioned that the **AB BANK 1ST MUTUAL FUND** will make its debut against the backdrop of a share market that has suffered a “crash” or large correction versus the peak. While media and conventional wisdom has characterized this period as a “crisis” phase of the share market, professional fund managers view such crisis as an opportunity. It is much more difficult to provide positive returns to investors when a Fund builds its investment portfolio at the peak of the market. While any capital market investment is fraught with risks, and no guarantees can be provided, the **AB BANK 1ST MUTUAL FUND** enters its investment phase at a period that is more amenable to providing long-term healthy returns to its investors.

2.3. ADVANTAGES IN INVESTING IN AB BANK 1ST MUTUAL FUND:

Generally investment in mutual funds enjoys some additional advantages compared to investments made directly in other securities of the capital market. Investors of this mutual fund should be able to enjoy the following advantages.

- 1) The Fund will maintain a diversified portfolio which will lower the investment risk for investors.
- 2) The diversified portfolio will allow investors gain a broad exposure to the overall stock market which may not be possible at the individual level.
- 3) This Fund provides access to extensive local research and investment experience. The Fund Manager, RACE Management PCL has developed deep insight into the dynamics of the local capital markets. RACE's research department consistently produces insightful research products on the Bangladeshi stock market which have been highly commended by both local stock market participants and foreign investors.
- 4) As the management of the investments in the Fund is outsourced to a professional Asset Management Company, investors will be relieved from any emotional stress associated with day-to-day management of individual investment portfolio. In fact, investment management usually requires a significant amount of time-consuming research and analyses to identify the highest-quality securities which may not be doable for the general investor and is, therefore, best left to professional investment managers.
- 5) The investors will be able to save transaction costs as he/she has access to a large number of securities by purchasing a single unit of AB BANK 1ST MUTUAL FUND.
- 6) Management and operation of Mutual Funds are subject to strict regulations from Bangladesh Bank, SEC and the Trustee. SEC regularly monitors the performance of such funds. The laws governing mutual funds require exhaustive disclosures to the regulator and general public and, as such mutual funds are one of the most transparent investment vehicles in Bangladesh.
- 7) In Bangladesh, the mutual funds enjoy a 10% (ten percent) reserved quota in all Initial Public Offerings (IPOs). Given the lack of supply of high-quality scripts in the Bangladeshi stock market, IPOs have historically outperformed the general Bangladeshi market index significantly and, therefore, have been a major source of outperformance for the mutual fund industry in Bangladesh.

2.4. THE CONSTITUTION OF THE FUND:

4. RISK CONSIDERATIONS

4.1. RISK FACTORS:

Investing in the AB BANK 1ST MUTUAL FUND (hereinafter the Fund) involves certain considerations in addition to the risks normally associated with making investments in securities. There can be no assurance that the Fund will achieve its investment objectives. The value of the Fund may go down as well as up and there can be no assurance that on redemption, or otherwise, investors will receive the amount originally invested. Accordingly, the Fund is only suitable for investment by investors who understand the risks involved and who are willing and able to withstand the loss of their investments. In particular, prospective investors should consider the following risks:

1. **In General:** There is no assurance that the Fund will meet its investment objective; investors could lose money by investing in the Fund. As with all mutual funds, an investment in the Fund is not insured or guaranteed by the Government of Bangladesh or any other government agency.
2. **Market Price Risk:** Stock prices and Mutual Fund prices generally fluctuate because of the interplay of the various market forces that may affect a single issuer, industry or the market as a whole. The Fund may lose its value or experience a substantial loss on its investments due to such market volatility.
3. **NAV Risk:** Stock market trends show that prices of many listed securities move in unpredictable directions, which may affect the value of the Fund's portfolio of listed securities. Depending on its exposure to such securities, the net asset value of units issued under this Fund can go up or down depending on various factors and forces affecting the capital markets. Moreover, there is no guarantee that the market price of the Fund's units will fully reflect the underlying asset value of the Fund.
4. **Issuer Risk:** In addition to market and price risk, value of an individual security can, in addition, be subject to factors unique or specific to the issuer, including but not limited to management malfeasance, lack of accounting transparency, management performance, management decision to take on financial leverage. Such risk can develop in an unpredictable fashion and can only be partially mitigated, and sometimes not at all, through research or due diligence. To the degree that the Fund is exposed to a security whose value declines due to issuer risk, the Fund's value may be impaired.
5. **Asset Allocation Risk:** Due to a very thin secondary debt market in Bangladesh, it would be difficult for the Fund Manager to swap between asset classes, if and when required. In addition, limited availability of money market instruments in the market implies that there are only few opportunities for short term or temporary investments for the Fund.
6. **Lack of Diversification Risk:** Due to a small number of listed securities in both the Stock Exchanges, it may be difficult to invest the Fund's assets in a widely diversified portfolio.
7. **Liquidation Risk:** Market conditions and investment allocations may impact on the ability to sell securities during periods of market volatility. The Fund may not be able to sell securities or instruments at the appropriate price and/or time.
8. **Dividend Risk:** If the companies wherein the Fund will be invested fail to pay expected dividend, it may affect the overall returns of the Fund.
9. **Investment Strategy Risk:** The Fund is subject to management strategy risk because it is an actively managed investment portfolio. The AMC will apply investment techniques and risk analyses in making investment decisions for the Fund, but there is no guarantee that these techniques and analyses will produce the desired results.
10. **Socio-Political & Natural Disaster Risk:** Uncertainties resulting from political and social instability may affect the value of the Fund's Assets. In addition, adverse natural climatic condition may hamper the performance of the Fund.

4.2. EXPECTED MARKET PERFORMANCE OF THE FUND:

- 1) Brand name of AB Bank Limited, RACE Management PCL's track record in the successful management of several mutual funds in the past may motivate investors to invest in this Fund.
- 2) World class investment management team of RACE Management PCL as a second-generation Asset Management Company (AMC) would attract investors to invest in this Fund.

4.3. WHO SHOULD INVEST AND HOW MUCH TO INVEST:

- 1) Individuals who do not have tolerance of bearing risk and know nothing about the functioning of the capital market need not apply for the units of the Fund.
- 2) Individuals who are looking for long-term capital growth and consistent dividend payments and are

comfortable with the risks associated with equity investments should consider investing in the Fund.

- 3) An individual should also consider investing in the Fund if he/she can accept some variability of returns, has a moderate tolerance for risk and is planning to invest in the Fund over the medium to long-term.
- 4) Considering other factors such as investment opportunities available in the market, return expectations, income levels and consumption patterns, one may put only a portion of his/her total portfolio into the Fund.

A flexible yet disciplined investment process is the hallmark of a professional investment management fund. Incorporating the intellectual capital and collective experience of the RACE's senior investment professionals, RACE has developed a 7-step investment process:

Step 1: Universe Selection: The first step of the investment process begins with identifying the universe of stocks. These stocks are then classified in four categories based on RACE's proprietary selection methodology.

Step 2: Focus List: The universe of stock is then narrowed down to build a prospective focus list. This step is usually done in phases. The first phase involves narrowing down the list through RACE's proprietary filtering process. The second phase involves narrowing the list further through the fundamental research inputs.

Step 3: "Top Down" Analysis: This step involves analysis of macroeconomic trends, analysis on broad market indices, analysis of fund flow trend to formulate sector biases and sector allocations.

Step 4: "Bottoms Up" Company Analysis: This step involves a combination of individual security analysis based on multiple parameters, including valuation, qualitative analysis to identify business trends, competitive outlook and corporate management. These analyses are supplemented by company visits and information exchange with management.

Step 5: Portfolio Construction: The next step is to create an optimum portfolio with the goal of maximizing returns and minimizing risk.

Step 6: Risk Management: This step applies the pre-determined position limits to the portfolio, limiting sector exposure and individual stock exposure. Maintaining lower volatility is also an important concern; to this end, beta adjustment and other sophisticated risk analysis is used.

Step 7: Trade Execution: RACE uses a combination of quantitative strategies and market information to maximize its trade executions. To this end, RACE has selected a panel of brokers to execute its trades in an efficient and confidential manner.
