Number of units

This represents the number of units outstanding at the beginning of the year plus the number of reinvestment units (RIU) issued during the year. The logic behind this basis is, that the re-investment units (RIU) are issued to the existing unit holders without any consideration, and therefore, the number of units outstanding is increased without an increase in resources generating new earnings. Due to the change in number of units earnings per unit for the year 2013 has been restated.

22. Events after the reporting period

The Trustee of the Fund has approved dividend at the rate of 10% on the capital fund of Taka 1,626,156,430 in the form of re-investment units to be issued at a valuation of the last published NAV per Unit before the record date for the year ended 30 june 2014 at the meeting held on 14 august 2014.
